

## **THERE ARE SEVERAL WAYS TO VERIFY A CHEKXCEPT CARD.**

1. The merchant can save an Internet shortcut with a triangle icon to their desktop. When they click the icon they go to a member lookup on our web site that prompts them to input their merchant number and the card number of the card holder.

They will receive the following information:

Jones, Susan 3456-8796-6675-1109 Approved

**OR**

Jones, Susan 3456-8796-6675-1109 Denied

This membership information on our website is updated daily.

2. The merchant can click on that same icon and at the same page, request a listing of bad card numbers.

They will get a listing that looks like this:

### **Bad ChekXcept Cards 10/05/07**

Jones, Susan 3456-8796-6675-1109  
Roberts, Jack 4445-9090-8723-0921  
Smith, Mary 5563-3312-7856-0934

3. Supermarkets point of sale systems and other sophisticated cash registers allow for the input of banking information from a bad check. If a card holder bounces a check, we can send that banking information to those merchants who have point of sale systems where this information can be input. We presently work like this with many of our clients. The actual bad check information, ie: routing number, bank account number, and ChekXcept Card number can be sent to the merchant and then input into the register system, at the option of the merchant.
